ZINNIAS

# **FREDERICK W. EBERLE**

**79-81 Franklin St.  
ALBANY 2, N. Y.**

**Phone: Albany, N. Y. 4-0325**

This is our 1958 catalog of new worthwhile introductions as well as those standard varieties that have not as yet been surpassed. We will continue as in the past to furnish only the best strains of these varieties.

All goods are offered subject to prior sale. We reserve the right to pro-rate orders in case of crop failure causing shortages.

All goods sold to our regular customers or those of approved credit rating are due and payable June 1, 1958. All goods purchased after June 1 will be due and payable 30 days from date of invoice.

Kindly write for special prices on larger quantities of any item.

Since there are so many factors which influence the germination of seeds and the subsequent development of the plant, we give no warranty express or implied as to description, quality, productiveness or any other matter of any seeds, bulbs or plants we send out and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

**No Charge For Bags**

Okra, Dwarf Green Long Pod

## Watermelon

**STONE MOUNTAIN.** 90 days. Fruits are almost round, dark green, slightly ribbed. Flesh bright red, very sweet. \$0 40 1 15 3 50

**WINTER QUEEN.** 90 days. Fruits medium sized, smooth, pale green, faintly striped. Flesh bright red, crisp and sweet. 40 1 15 3 50

**NEW HAMPSHIRE MIDGET.** 78 days. A small, very early variety. Fruits oval, light mottled green. Light red flesh of good quality. 40 1 20 3 75

**RHODE ISLAND RED.** 86 days. An outstanding new variety. Earliness, quality, small size and heavy yield make it one of the best yet for northern use. 50 1 50 4 00

## Mustard

**FORDHOOK FANCY.** 60 days. 1/4 lb. 1 lb. 10 lbs or more per lb. Bright green leaves with curled edges. \$0 50 \$1 50 \$1 15

**GIANT SOUTHERN CURLED.** 60 days. Leaves bright green, very curly. It is very hardy and much slower to bolt than the original strains. 50 1 50 1 15

## Okra

**DWARF GREEN LONG POD.** 55 days. Plants 2 1/2 to 3 feet tall. Pods dark green, up to 7 to 8 inches long and an inch thick. \$0 50 \$1 50 \$1 40

## Onion

**BELTSVILLE BUNCHING.** 60 days. Similar to Evergreen Bunching. Shorter and slightly thicker stems. Milder flavor. If available. \$9 00

**BRIGHAM YELLOW GLOBE.** 110 days. Deeper color than Southport Yellow. Excellent keeper. \$1 50 \$4 50 4 30

**CRYSTAL WAX.** 95 days. Medium early, flat white Onion with a mild flavor. 1 50 4 50 4 30

**EARLY YELLOW GLOBE.** 100 days. A very early variety of medium size and good shape. Attractive color. Very productive. 1 50 4 50 4 30

**EVERGREEN WHITE BUNCHING.** A hardy bunching variety. 1 50 5 00 4 75

**PRIZETAKER.** 115 days. Extra large, globe-shaped, deep yellow variety of mild flavor. 2 00 6 00 5 50

**SOUTHPORT RED GLOBE.** 110 days. Standard red globe-shaped Onion. 1 70 5 00 4 80

## ONION, Continued

<b>SOUTHPORT WHITE GLOBE.</b> 110 days. A globe-shaped, pure white Onion of mild flavor. Often used as a bunching Onion.....	1 lb. or more per lb.	10 lbs. or more per lb.
.....\$1 70	\$5 00	\$4 75
<b>SOUTHPORT YELLOW GLOBE.</b> 110 days. Oval shape. Very uniform. Excellent keeper.....	1 50	4 50 4 20
<b>SWEET SPANISH.</b> 115 days. A handsome globe-shaped Onion. Large bulbs with small neck and rich orange color.....	2 00	6 00 5 50
<b>WHITE LISBON.</b> 60 days. The best white bunching sort, with heavy, dark green tops. Very mild.....	1 60	4 75 4 40
<b>WHITE PORTUGAL OR SILVER-SKIN.</b> 100 days. Widely used as a pickling or bunching Onion. Bulbs medium sized, flat, white.....	1 70	5 00 4 80
<b>WHITE SWEET SPANISH.</b> 110 days. Similar to Sweet Spanish but white skinned and earlier. Makes a very good bunching Onion.....	2 00	6 00 5 80

## Parsnip

<b>HOLLOW CROWN.</b> 130 days. Roots uniform in shape, 12 to 14 inches long and 2½ to 3 inches at the shoulder, tapering to a point.....	\$0 60	\$1 85	\$1 75
<b>MODEL.</b> 130 days. Roots more evenly tapered than Hollow Crown.....	60	1 85	1 75

## Peas

<b>LAXTON'S PROGRESS.</b> 62 days. An early, large-podded, dwarf variety. The vines are robust, producing an abundance of dark green pods that are very attractive and contain 8 to 10 large Peas of excellent quality. Pointed pods, 4½ inches long. Height 1½ ft.....	Lb.	10 lbs. or more per lb.	60 lbs. or more per lb.
.....\$0 40		\$0 33	\$0 30
<b>LITTLE MARVEL.</b> 62 days. Early, dwarf variety. Pods blunt, 3 inches long, dark green, well filled. Height 1½ ft.....	40	33	30
<b>PRINCE EDWARD.</b> 75 days. A late main-crop variety. Very productive. The 5-inch, pointed pods are dark green and well filled. Flavor is excellent. Height 4 to 4½ ft.....	40	33	30
<b>THOMAS LAXTON.</b> 60 days. An early variety with dark green pods well filled with Peas of delicious flavor. Vines are very productive. Blunt pods 3½ inches long.....	40	33	30
<b>WORLD'S RECORD.</b> 60 days. An excellent early variety. The strong vines produce a heavy crop of large Peas. Pods 4½ inches long, pointed. Height 2½ ft.....	40	33	30

Onion, Southport Yellow Globe

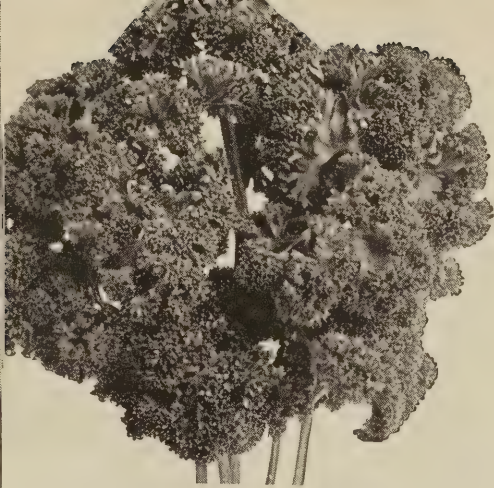

Parsnip, Hollow Crown

Peas, Little Marvel

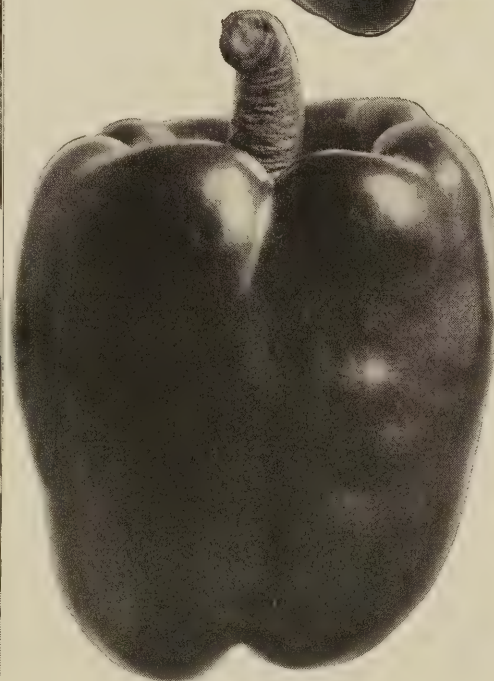

Parsley, Champion Moss Curled

Pepper,  
Surprise

Pepper, California Wonder

## Parsley

	75 days.	1 lb. or more per lb.	10 lbs. or more per lb.
<b>CHAMPION MOSS CURLED.</b>	Compact, dark green, densely curled.	75 1/4 lb. \$0 65	\$2 00 \$1 75
<b>EXTRA DOUBLE CURLED.</b>	85 days. Our best strain of curled Parsley. Color very dark.	65	2 00 1 75
<b>HAMBURG or ROOTED.</b>	90 days. Grown for the roots.	65	2 00 1 75
<b>PARAMOUNT.</b>	85 days. Compact, 12 inches tall, densely curled, rich dark green.	65	2 00 1 75
<b>PLAIN or ITALIAN.</b>	80 days. Very dark green. Leaves cut but not curled.	65	2 00 1 75
<b>LARGE-LEAVED PLAIN.</b>	80 days. A larger-leaved strain of the Italian or Plain-leaved variety.	75	2 75 2 25

## Pepper

	72 days.	Oz.	1/4 lb.	Lb.
<b>CALIFORNIA WONDER.</b>	A large, heavy, smooth Pepper of dark green color.	\$1 10	\$3 25	\$8 50
<b>CAYENNE, LONG THIN.</b>	70 days. A long, slender variety, bright red when ripe. Very pungent.	1 10	3 25	9 00
<b>CAYENNE, LONG THICK.</b>	72 days. A longer and thicker variety of Cayenne. Fruits 7/8 inch at the shoulder and 6 to 8 inches long.	1 10	3 25	8 75
<b>EARLY GIANT.</b>	68 days. Recommended for early use. Large and sweet.	1 25	4 00	12 00
<b>HUNGARIAN YELLOW.</b>	70 days. Fruit bright yellow, 5 to 6 inches long by 1 inch thick, turning to red when ripe. Very pungent.	1 10	3 25	9 00
<b>ILLINOIS F-5.</b>	58 days. Heavy yielder. Thick walls, three or four lobes, 5 inches long x 3 to 4 inches thick. Good shipper.	1 35	4 00	12 00
<b>LARGE CHERRY RED.</b>	80 days. Cherry-shaped fruits, bright red when ripe and extremely pungent.	1 10	3 25	9 00
<b>NEAPOLITAN.</b>	65 days. Elongated fruit about 4 inches long. Greenish yellow.	1 10	3 25	9 00
<b>OAKVIEW WONDER.</b>	65 days. Similar to California Wonder but earlier and more productive.	1 10	3 25	9 00
<b>OSHKOSH.</b>	74 days. Medium early. Deep green turning to canary-yellow. Thick wall and mild flavor.	1 25	4 00	12 00
<b>SQUASH OR CHEESE.</b>	72 days. Flat, tomato-shaped, glossy green. Thick flesh.	1 25	3 80	10 50
<b>SUNNYBROOK.</b>	72 days. Tomato-shaped fruit, deep green turning to red. Flesh thick and mild.	1 25	3 80	10 50
<b>SURPRISE.</b>	70 days. A very prolific variety. Fruits 5 inches long and 3 1/2 inches in diameter. Deep green turning to deep red. Flesh thick and mild.	1 10	3 25	9 00

## PEPPER, Continued

**WORLD BEATER.** 70 days. A standard main-crop variety with large, deep green fruit. . . . . \$1 10 3 25 9 50

**YOLO WONDER.** 78 days. A tobacco-mosaic-resistant variety a week later than California Wonder. Fruits blocky, with thick flesh, not quite so deep green as California Wonder. . . . . 1 10 3 25 8 50

## Pumpkin

**CONNECTICUT FIELD.** 115 days. Large, orange-yellow fruit. Used for canning or stock feeding. . . . . \$0 30 \$0 85 \$2 50

**JACK-O-LANTERN** . . . . . 30 85 2 50

**LARGE CHEESE.** 120 days. Large, flat, creamy buff fruit of excellent quality. . . . . 30 85 2 50

**SMALL SUGAR.** 110 days. A small, round, reddish orange variety. Rich salmon-yellow flesh of fine quality. . . . 30 85 2 50

**SUGAR PIE.** 6 to 8 inches in circumference, deep orange. . . . . 30 85 2 50

All Pumpkins, 10 lbs., \$2.00 per lb.

## Radish

**CHERRY BELLE.** 22 days. A very attractive variety for either greenhouse or outdoor planting. Round, bright scarlet-red with a fine tap-root. Tops short, dark green.

**COMET.** 25 days. One of the best of the Scarlet Globe type. Roots oval, bright clear red. Tops medium. It will stand without becoming pithy. A good variety for cello-pak.

**EARLY SCARLET GLOBE FORCING.** 23 days. Especially adapted for forcing. The earliest globe-shaped variety. Bright scarlet, uniform in size, with short tops just right for bunching.

**EARLY SCARLET GLOBE.** 25 days. Selected strain of this standard variety. Uniform globe shape, bright scarlet color, medium top.

**ICICLE.** 30 days. A handsome long white Radish. Crisp and mild flavored.

**ICICLE FORCING.** 27 days. A very select strain for greenhouse use. Tops shorter than Icicle. Roots more cylindrical, waxy white in color.

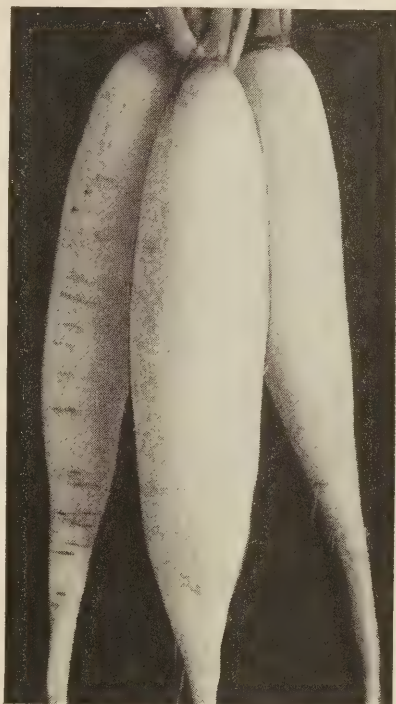

**ROUND BLACK SPANISH.** 55 days. Round black roots, 3 to 4 inches in diameter. Flesh white, firm. A good keeper.

**WHITE STRASBURG.** 40 days. A long white summer Radish, 5 inches long and 2 inches at the shoulder, tapered.

Salsify, Mammoth Sandwich Island

Spinach, Bloomsdale Long-Standing

Savoy Long-standing No. 818

## Rape

	1 lb. or more per lb.	10 lbs. or more per lb.	25 lbs. or more per lb.
<b>DWARF ESSEX.</b> A quick-growing plant sometimes used for greens and cooked like cabbage.....	\$0 50	\$0 46	\$0 44

## Salsify

	Oz.	¼lb.	Lb.
<b>MAMMOTH SANDWICH ISLAND.</b> 150 days. Long, tapering, creamy white roots.....	\$0 55	\$1 60	\$5 00

## Sorrel

<b>NARROW-LEAVED.</b> Long, narrow, bright green leaves.....	\$0 75	\$2 00	\$6 00
--	--------	--------	--------

## Spinach

	1 lb. or more per lb.	10 lbs. or more per lb.	25 lbs. or more per lb.
<b>AMERICA.</b> 44 days. Dark green leaves; compact plant. While slower to mature, it will stand a great deal of hot weather.....	\$0 65	\$0 60	\$0 58

<b>BLIGHT-RESISTANT SAVOY.</b> 39 days. Best suited for fall cutting. A dark green, heavily crumpled variety. Will bolt to seed if planted too early..	50	45	42
--	----	----	----

<b>BLOOMSDALE SAVOY.</b> 40 days. A quick-growing strain with dark green, heavily crumpled leaves.....	50	45	42
--	----	----	----

<b>BLOOMSDALE LONG-STANDING.</b> 42 days. Superior in every way to Bloomsdale. Almost as early, with heavier plants that remain much longer before going to seed.....	50	45	42
---	----	----	----

<b>KING OF DENMARK.</b> 48 days. A dark green variety with large, thick, slightly crumpled leaves. Will stand hot weather as well as any variety....	50	45	42
--	----	----	----

<b>NEW ZEALAND.</b> Not a true Spinach but a plant that thrives in hot weather and will produce greens all summer long.....	1 50	1 25	
---	------	------	--

<b>NOBEL GIANT THICK-LEAF.</b> 45 days. A round-leaf variety with thick, dark leaves.....	50	45	42
---	----	----	----

<b>OLD DOMINION.</b> 41 days. A long-standing form of Blight-resistant, slightly slower to mature. In eastern states it may be sown ten days earlier than Blight-resistant without going to seed.....	50	45	42
---	----	----	----

<b>SAVOY LONG-STANDING NO. 818.</b> 42 days. An improved form of Long-standing Savoy, withstanding summer heat better than any other Savoy type except America. It is earlier than America. The attractive dark green leaves are intensely crumpled. We highly recommend this strain.....	50	45	42
---	----	----	----

## SPINACH, Continued

	1 lb. or more per lb.	10 lbs. or more per lb.	25 lbs. or more per lb.
<b>VIKING.</b> 45 days. A popular variety for canning and freezing. Leaves large, heavy, dark green.....	\$0 50	\$0 45	\$0 42

## Squash

### Summer Varieties

	Oz.	¼lb.	Lb.
<b>CASERTA.</b> 58 days. An early bush-type Squash similar to Cocozelle. Fruits are grayish green, striped with darker green. Very early and productive.....	\$0 50	\$1 25	\$2 75
<b>COCOZELLE STRIPED.</b> 65 days. Dark green with light green stripes...	50	1 25	2 75
<b>EARLY PROLIFIC.</b> 50 days. An early, high-yielding yellow summer Squash. Fruits straight, smooth, light yellow.....	35	1 00	2 75
<b>MAMMOTH WHITE BUSH SCALLOPED.</b> 50 days. Fruits round, flattened, with scalloped edges.....	35	1 00	2 75

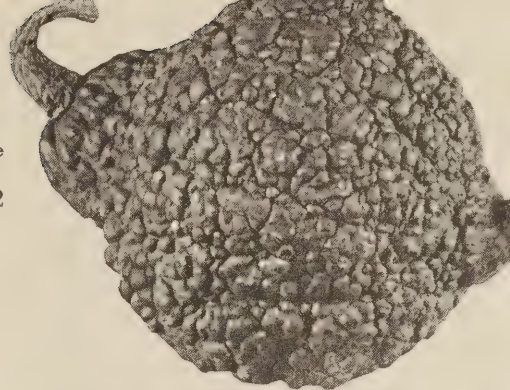

All Summer Squash, 5 lbs., \$2.50 per lb.

### Winter Varieties

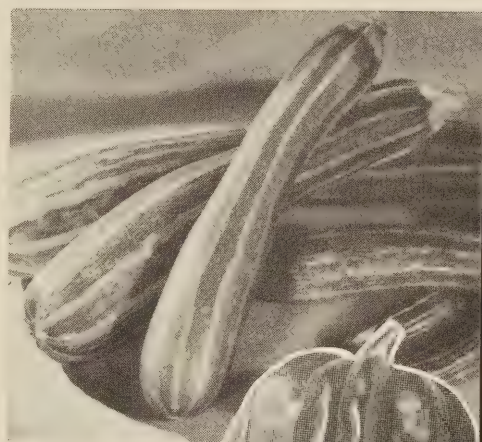

<b>BLUE HUBBARD.</b> 108 days. Similar to Hubbard but blue-gray in color....	\$0 35	\$1 00	\$3 00
<b>BUTTERCUP.</b> 100 days. Turban shape. Flesh deep yellow, fine grained. Excellent for freezing or for winter storage.....	50	1 50	3 50
<b>BUTTERNUT.</b> 95 days. The quality of this variety is making it more popular every year. Delicious for pies; excellent baked or boiled.....	50	1 50	3 50

Buttercup and Butternut, 5 lbs., \$3.25 per lb.

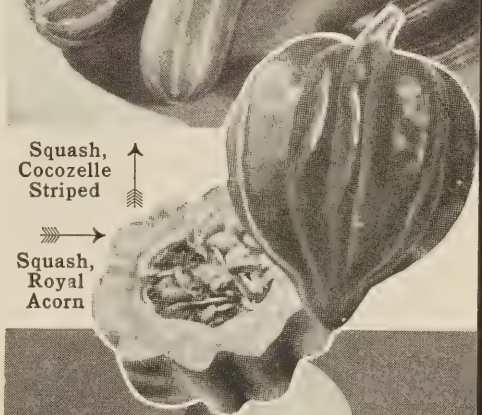

<b>GOLDEN DELICIOUS.</b> 103 days. A bright orange form of Green Delicious.	35	1 00	3 00
<b>GREEN DELICIOUS.</b> 103 days. Both this and Golden Delicious are excellent winter varieties. Broad, top-shaped fruit with dark green skin and bright yellow, fine-grained flesh...	35	1 00	3 00
<b>GOLDEN HUBBARD.</b> 100 days. Similar to Hubbard but slightly smaller. Orange-red in color.....	35	1 00	3 00
<b>IMPROVED HUBBARD.</b> 105 days. Selected strain of this standard winter variety.....	35	1 00	3 00
<b>WARTED HUBBARD.</b> 110 days. Slightly larger than Hubbard. Dark green, heavily warted. Excellent quality.....	30	90	2 75
<b>ROYAL ACORN.</b> 90 days. A selection from Table Queen. Fruits are the same but larger, averaging 7½ inches long by 6 inches through.....	30	90	2 75
<b>TABLE QUEEN (Acorn or Des Moines).</b> 80 days. A very popular variety. Fruits dark green, acorn shaped, 5½ inches long by 4 inches through.....	30	90	2 75

**AMERICAN PURPLE-TOP.** 90 days. A standard variety producing large, well-shaped, fine-grained roots. \$0 25 \$0 50 \$1 50

Hybrid Tomato, Hybrid E-21

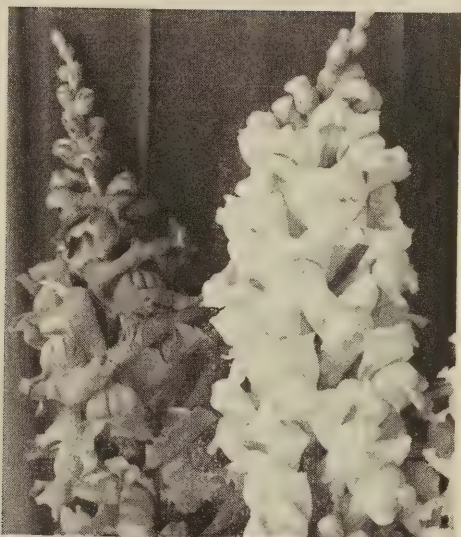

Hybrid Tomato, Early Sensation

Turnip, Purple-Top White Globe

*If you raise plants to sell from pots or flats, you should certainly try these varieties.*

### **AGERATUM, BLUE MINK**

A grand new Ageratum with much larger flower trusses, in an attractive shade of powder-blue.

### **ANTIRRHINUM, TETRA**

Your customers will remember where they bought this new sturdy Snap with the beautiful ruffled blooms and will be back for more.

### **CARNATION, ENFANT DE NICE, DWARF BOUQUET**

If you have a demand for an annual Carnation, try this. It has the typical large bloom of the Enfant de Nice but a much more compact plant.

### **DAHLIA, DWARF HYBRIDS**

Every year more and more of this is sold as people find how easy it is to grow Dahlias from potted plants. This early strain takes only 80 days to give you blooming plants which sell themselves.

### **MARIGOLD, LEMONDROP**

An early-blooming, fully double, dwarf Marigold with lemon-yellow flowers.

### **PETUNIA, POPCORN**

White Petunias are becoming more and more popular, and this is one that will attract attention. Huge blooms and dwarf, compact plant make it outstanding.

### **PETUNIA, EXTRA DWARF GIANTS OF CALIFORNIA**

Picture a plant only 3 inches tall, with two or three blooms 3 to 4 inches in diameter, in any one of a number of colors and color combination, and you will have some idea of what this strain is like.

### **STOCKS, TRYSONIC**

This will not only give you a plant that will sell well but will also grow well in the garden. It will bloom when only 6 to 8 inches tall and keep on growing all season long.

### **SWEET WILLIAM, DWARF SINGLE MIXED**

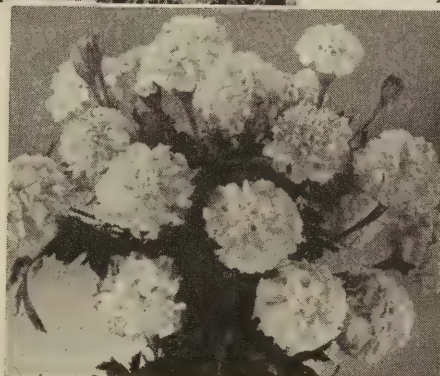

Sweet Williams are an old favorite, and this is the neatest, most attractive strain to sell as a bedding plant.
